8.

i. Adequate numbers of computers

Computer labs

ii. Usage of computer hardware

The college provides an adequate number of computers, exceeding standard requirements with a ratio of one computer per 16 students, ensuring that each student has ample access to technology. The available computer hardware is fully utilized, with a 100% usage rate, supporting various academic activities and practical sessions. This enhanced access to computers ensures that students can effectively engage with digital learning and complete their coursework efficiently.
